ECO-BIO 2018: Team up to accelerate the global bioeconomy

ECO-BIO 2018 will bring together all concerned with the bioeconomy – including delegates from academia, industry, government and NGOs - to share the latest in scientific and technological advances, impact assessment, innovation and valorisation in biobased products and processes.

A comprehensive programme includes more than 20 plenary and invited speakers, forum discussions, contributed short talks and posters plus company visits.

Speakers include: Mark Ferguson, Director General, Science Foundation Ireland; Rob van Leen, Chief Innovation Officer, DSM, The Netherlands, Roberto Rinaldi, Imperial College London and Goncalo Pereira, Brazilian Bioethanol Science and Technology Laboratory, Brazil

The conference is an opportunity to make new research partnerships and to learn of the latest advances in industrial biotechnology.
