Delegated Regulation for high ILUC risk feedstock

Delegated Regulation for high ILUC risk feedstock is a step forward for a sustainable biofuels industry and an opportunity to improve European farming capacities and rural jobs

The delegated act is an important step forward for the implementation of the RED II
The criteria to ensure the full traceability of the whole value chains should be reinforced to minimize ILUC risks. An impact assessment is necessary
Sustainable biomass supply for advanced biofuels can offer a win-win opportunity to maintain European farming capacities and jobs

ETIP Bioenergy welcomes the Delegated Regulation for the determination of â??High indirect land-use change-risk feedstock and the certification of low indirect land use change-risk biofuels, bioliquids and biomass fuelsâ?• published by the European Commission on March 13th.
